EDUCATION

Bachelor of Science in Computer Engineering

Marinduque State University

2026-2027

Relevant Coursework:

- Programming Fundamentals
- Digital Logic Design
- Computer Systems
- Data Structures
- MATLAB & Engineering Computations
- Object-Oriented Programming

TECHNICAL SKILLS

- Programming Languages: C/C++, MATLAB, Python (basic)
- Software & Tools: MATLAB, MS Word, Excel, PowerPoint, Google Workspace
- Hardware & Systems: Basic troubleshooting, Arduino, circuit analysis
- Other Skills: Data analysis (basic), documentation, technical writing

SOFT SKILLS

- Strong communication skills (oral & written)
- Time management & multitasking
- Fast learner and adaptable
- Team player with leadership experience
- Problem-solving and analytical thinking

OBJECTIVE

Motivated and detail-oriented Computer Engineering student seeking a part-time position where I can apply my technical knowledge, problem-solving skills, and strong work ethic while gaining practical experience and supporting my studies.

LEADERSHIP & ORGANIZATIONAL EXPERIENCE

AUDITOR

MARSU-ICPEP.SE A.Y. 2024-2025

- Monitored and reviewed financial records, budgets, and expense reports of the organization
- Ensured transparency, accuracy, and compliance with organizational policies
- Assisted in auditing funds used for academic and organizational activities
- Prepared audit reports and presented findings to officers and advisers
- Helped promote accountability and responsible financial management among members

VICE PRESIDENT FOR EDUCATION

MARSU-ICPEP.SE A.Y. 2024-2025

- Assisted in organizing academic workshops and tutorials
- Coordinated with officers and members for educational activities
- Supported students through peer mentoring and academic initiatives
- Helped improve student engagement and learning outcomes

ACADEMIC PROJECTS

HOTEL BOOKING APPLICATION ("NINI") – SOFTWARE PROJECT

- Designed and developed a hotel booking system for managing room reservations, customer details, and booking schedules
- Created UML diagrams (use case, class, and sequence diagrams) to model system functionality and user interactions
- Applied software engineering and system analysis principles to simulate real-world booking operations
- Documented system requirements and workflow for academic evaluation

MATLAB-BASED ENGINEERING PROBLEM SOLVING

- Developed MATLAB scripts to solve mathematical and engineering-related problems
- Analyzed computational results and interpreted outputs accurately
- Presented findings clearly through graphs, reports, and documentation
